1. **Estrogen therapy and Alzheimer's dementia.**  
[Review] [79 refs]  
Craig MC. Murphy DG.  
*Annals of the New York Academy of Sciences.* 1205:245-53, 2010 Sep.  
[Evaluation Studies. Journal Article. Review]  
UI: 20840280

Previous studies in postmenopausal women have reported that estrogen treatment (ET) modulates the risk for developing Alzheimer's disease (AD). It has recently been hypothesized that there may be a "critical period" around the time of menopause during which the prescription of ET may reduce the risk of developing AD in later life. This effect may be most significant in women under 49 years old. Furthermore, prescription of ET after this point may have a neutral or negative effect, particularly when initiated in women over 60-65 years old. In this paper, we review recent studies that use in vivo techniques to analyze the neurobiological mechanisms that might underpin estrogen's effects on the brain postmenopause. Consistent with the "critical period" hypothesis, these studies suggest that the positive effects of estrogen are most robust in young women and in

# OA Resultados

 To search Open Access content on Ovid, go to [Basic Search](#).

The screenshot shows the OvidSP search results interface. On the left, there is a sidebar with 'OvidSP' at the top, followed by 'Results Tools' and 'Options'. Below that is 'Search Information'. Under 'You searched:', it lists '1 and 2 and 3' and '- Search terms used: alzheimer disease, estrogens, therapeutics'. Under 'Search Returned:', it says '48 results'. Under 'Sort By:', there is a dropdown menu with a minus sign. The main content area shows a list of results. The first result is 'Short-term hormone therapy with transdermal estradiol improves cognition for postmenopausal women with Alzheimer's disease: results of a randomized controlled trial.' by Wharton W, Baker LD, Gleason CE, Dowling M, Barnet JH, Johnson S, Carlsson C, Craft S, Asthana S. The journal is 'Journal of Alzheimer's Disease', volume 26(3), pages 495-505, 2011. The UI number is 21694454. Below the title, there are links for 'Abstract Reference', 'Complete Reference', 'Find Similar', and 'Find Citing Articles'. At the bottom of the result, there are links for 'Full Text', 'Library Holdings', 'Document Delivery', and 'Bibliographic Links'. The interface also includes a 'Clear Selected' button, a 'View' dropdown set to 'Abstract', a '10 Per Page' dropdown, a '1' page indicator, and a 'GO' button. There are also icons for 'Print', 'Email', 'Export', 'Add to My Projects', and 'Keep Selected'.

# AccessMedicine – Custom Curriculum

McGraw-Hill Professional ▾

Access Provided by:

Home Sites ▾ User Services ▾ Subscribe ▾ Custom Curriculum MyAccess ▾

McGraw-Hill Medical's unique Custom Curriculum tool enables program directors and faculty to create and manage their residency curricula, creating interactive learning modules for their learners to meet the unique needs of their programs, making it a perfect tool for education and remediation. Best of all, Custom Curriculum is a FREE, already present feature of your subscription that simply needs to be activated.

**If you are seeing this page, Custom Curriculum instructor has not been activated on your My Access account.** To have instructor privileges added to your My Access account, please email us at [customcurriculum@mhprofessional.com](mailto:customcurriculum@mhprofessional.com). A member of our User Services team will get back to you shortly confirming that instructor privileges have been added to your account, at which point you'll be ready to begin building your curriculum. Don't have a My Access account? [Register for one here.](#)

With Custom Curriculum, instructors can:

- Create and populate assignments from all of the Access online medical resources licensed by their institution, including textbooks, videos, and case files
- Include Q&A tests, either drawing from the existing question bank or by authoring their own questions and dictating a minimum passing score
- Assign specific learners to each curriculum
- Report on progress and quiz scores by learner or by assignment
- Link out to external resources or upload files to include in their curricula
- Offer targeted remediation for specific learners

With Custom Curriculum, learners can:

- Easily access the exact resources their instructors have selected for them
- See which assignments are expected of them and which dates their assignment are due
- Keep track of their own assignment progress and quiz scores

# Herramientas de Búsqueda- Siempre accesibles

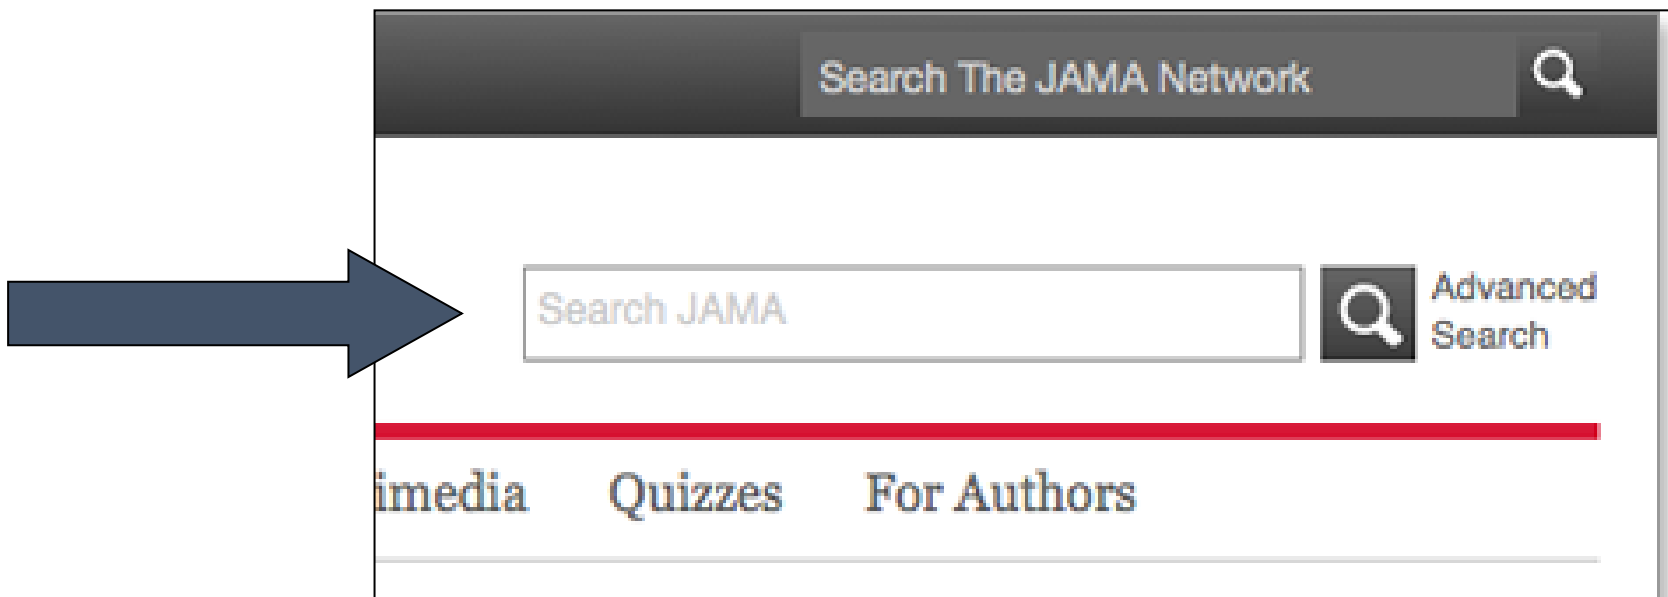

The screenshot shows the JAMA website interface. At the top, there is a navigation bar with 'The JAMA Network' and links for 'Journals', 'Specialties & Topics', 'Store', and 'Physician Jobs'. A search bar is located in the top right corner. Below the navigation bar, the main content area features a 'Current Issue' section for January 16, 2013, with a 'Table of Contents' and 'This Week in JAMA' summary. A featured article titled 'Bacterial Coinfection in Influenza' is highlighted. Below this, there is an 'Online First' section with several articles listed, including 'Influenza Prevention Update' and 'US Health Disadvantage Relative to Other High-Income Countries'. The page also includes a sign-in section for a personal account, a 'Featured Topic' section for 'Physical Activity', and an advertisement for 'ISNTRISSEB' (telaprevir).

Article **References**

How best to treat posttraumatic stress disorder (PTSD) is a long-standing question. Treatments for PTSD, which began in the late 19th century, have varied greatly.<sup>4</sup> In the current era, numerous PTSD treatments are available, some with a strong evidence base.<sup>2</sup> In this issue of *JAMA*, the findings of 2 randomized controlled trials of interventions for PTSD expand the boundaries of treatment to relatively underserved populations: the trial by Mills et al<sup>3</sup> assesses interventions in persons with PTSD and substance dependence, and the trial by Monson et al<sup>4</sup> assesses interventions in couples in which 1 partner has PTSD.<sup>4</sup>

The trial by Mills et al<sup>3</sup> evaluated Concurrent Treatment of PTSD and Substance Use Disorders Using Prolonged Exposure (COPE) plus usual treatment for substance dependence (n = 55) vs usual treatment for substance dependence alone (n = 48). COPE involved an individual modality treatment totaling 19.5 hours, whereas usual treatment was any type of substance use treatment available in the patient's community, including counseling, detoxification, residential rehabilitation, and pharmacotherapy. Prolonged exposure therapy is a type of cognitive-behavioral therapy that exposes patients to memories and reminders of traumatic events associated with intense negative emotions such as anxiety, anger, and sadness. Although this is the first published randomized controlled trial using prolonged exposure in patients with PTSD and substance use disorder, trials of other models for concurrent treatment of PTSD and substance use disorders have shown positive findings.<sup>5</sup> Prolonged exposure therapy is an evidence-based treatment for PTSD currently being implemented on a large scale within the US Veterans Affairs Healthcare System<sup>6</sup>; thus, results of this trial of prolonged exposure for co-occurring PTSD and substance dependence are of immediate

# Búsqueda Avanzada

The screenshot shows the JAMA website search results for 'Post traumatic stress'. The search bar at the top right contains the text 'Post traumatic stress' and has a magnifying glass icon. Below the search bar, the results are displayed. On the left, there is a 'Narrow Your Search' section with filters for 'Content Type' (Journal Articles (206)) and 'Journal' (JAMA (206)). The main results area shows 'Showing 1-20 of 206 results' and 'Sort By: Best Match | Most Recent | Oldest | CME View: Basic | Expanded'. The first result is 'Integrated Exposure-Based Therapy for Co-occurring Posttraumatic Stress Disorder and Substance Dependence: A Randomized Controlled Trial' by Katherine L. Mills, PhD, Maree Teesson, PhD, Sudie E. Back, PhD, Kathleen T. Brady, MD, PhD, Amanda L. Baker, PhD, Sally Hopwood, MPsych (Clin), Claudia Sannibale, PhD, Emma L. Barrett, PhD. The second result is 'Dorsolateral Prefrontal Cortex Activation During Emotional Anticipation and Neuropsychological Performance in Posttraumatic Stress Disorder' from Arch Gen Psychiatry, 2012;69(4):360-371. doi:10.1001/archgenpsychiatry.2011.1539. The third result is 'Emotional Reactivity to a Single Inhalation of 35% Carbon Dioxide and Its Association With Later Symptoms of Posttraumatic Stress Disorder and Anxiety in Soldiers'.
